SVI soil

TCE trichloroethene

## Purpose

On behalf of Lockheed Martin Corporation (Lockheed Martin), Stantec Consulting Services Inc. (Stantec) has prepared this report for the Solvent Dock Area at the former Lockheed Martin French Road facility in Utica, New York (the Site). This report is required by the October 3, 2008 New York State Department of Environmental Conservation (NYSDEC) Order on Consent (the Order; CO 6-20080321-5), and in Attachment 3-1 (Corrective Action Requirements), Section B.8, of the Order. The following sections summarize activities and information for the Third Quarter (July, August and September) of 2016.

### 1. Summary of Work Completed During the Reporting Period

The following activities were completed during the reporting period:

Obtained monthly samples of effluent water from the groundwater collection and treatment system (GCTS) for compliance with the existing State Pollutant Discharge Elimination System (SPDES) permit (NY-012-1894). Results were documented in monthly Discharge Monitoring Reports submitted to NYSDEC.

Performed ongoing operation, monitoring and maintenance (OM&M) of the interim corrective measure (ICM) for groundwater (i.e., the groundwater collection and treatment system, or GCTS).

Performed ongoing OM&M of the ICM for sub-slab soil gas (i.e., the sub-slab depressurization system, or SSDS).

Provided, on July 8, 2016 to the Oneida County Industrial Development Agency (OCIDA; current "fee simple" owner of the Site) and ConMed Corporation (ConMed; leaseholder of the Site) a Draft Environmental Easement and Draft Site Management Plan for their review and comment. Also provided was a NYS tax TP-584 form, which will require owner signature as part of the final Easement package.

Performed, during the period July 11 through 13, 2016 the Third Quarter 2016
