**ATTACHMENT 3-1  
CORRECTIVE ACTION REQUIREMENTS**

**CORRECTIVE ACTION REQUIREMENTS**

**AREAS OF CONCERN**

- (a) Quality Assurance/Quality Control protocols to ensure that data generated is valid and supported by documented procedures;

submitting progress and final reports; and

- (c) Plans for the treatment, storage, discharge or disposal of wastes to be generated by activities described therein

(a) If, at any time, the Commissioner determines that a release or, based on site-specific circumstances, a threatened release of hazardous wastes, including

4. Concentration of hazardous constituents in soils that have the potential to migrate to the air, groundwater or surface water; and

5. Other situations that present a threat to human health.

7. Determination of No Further Action.

(a) The Respondent need not undertake corrective action at any SWMU(s) and/or AOC(s) identified in Table-1 (Attachment 3-2) as No Further Action.

8. Progress Reports

The Respondent shall submit quarterly progress reports beginning the first full

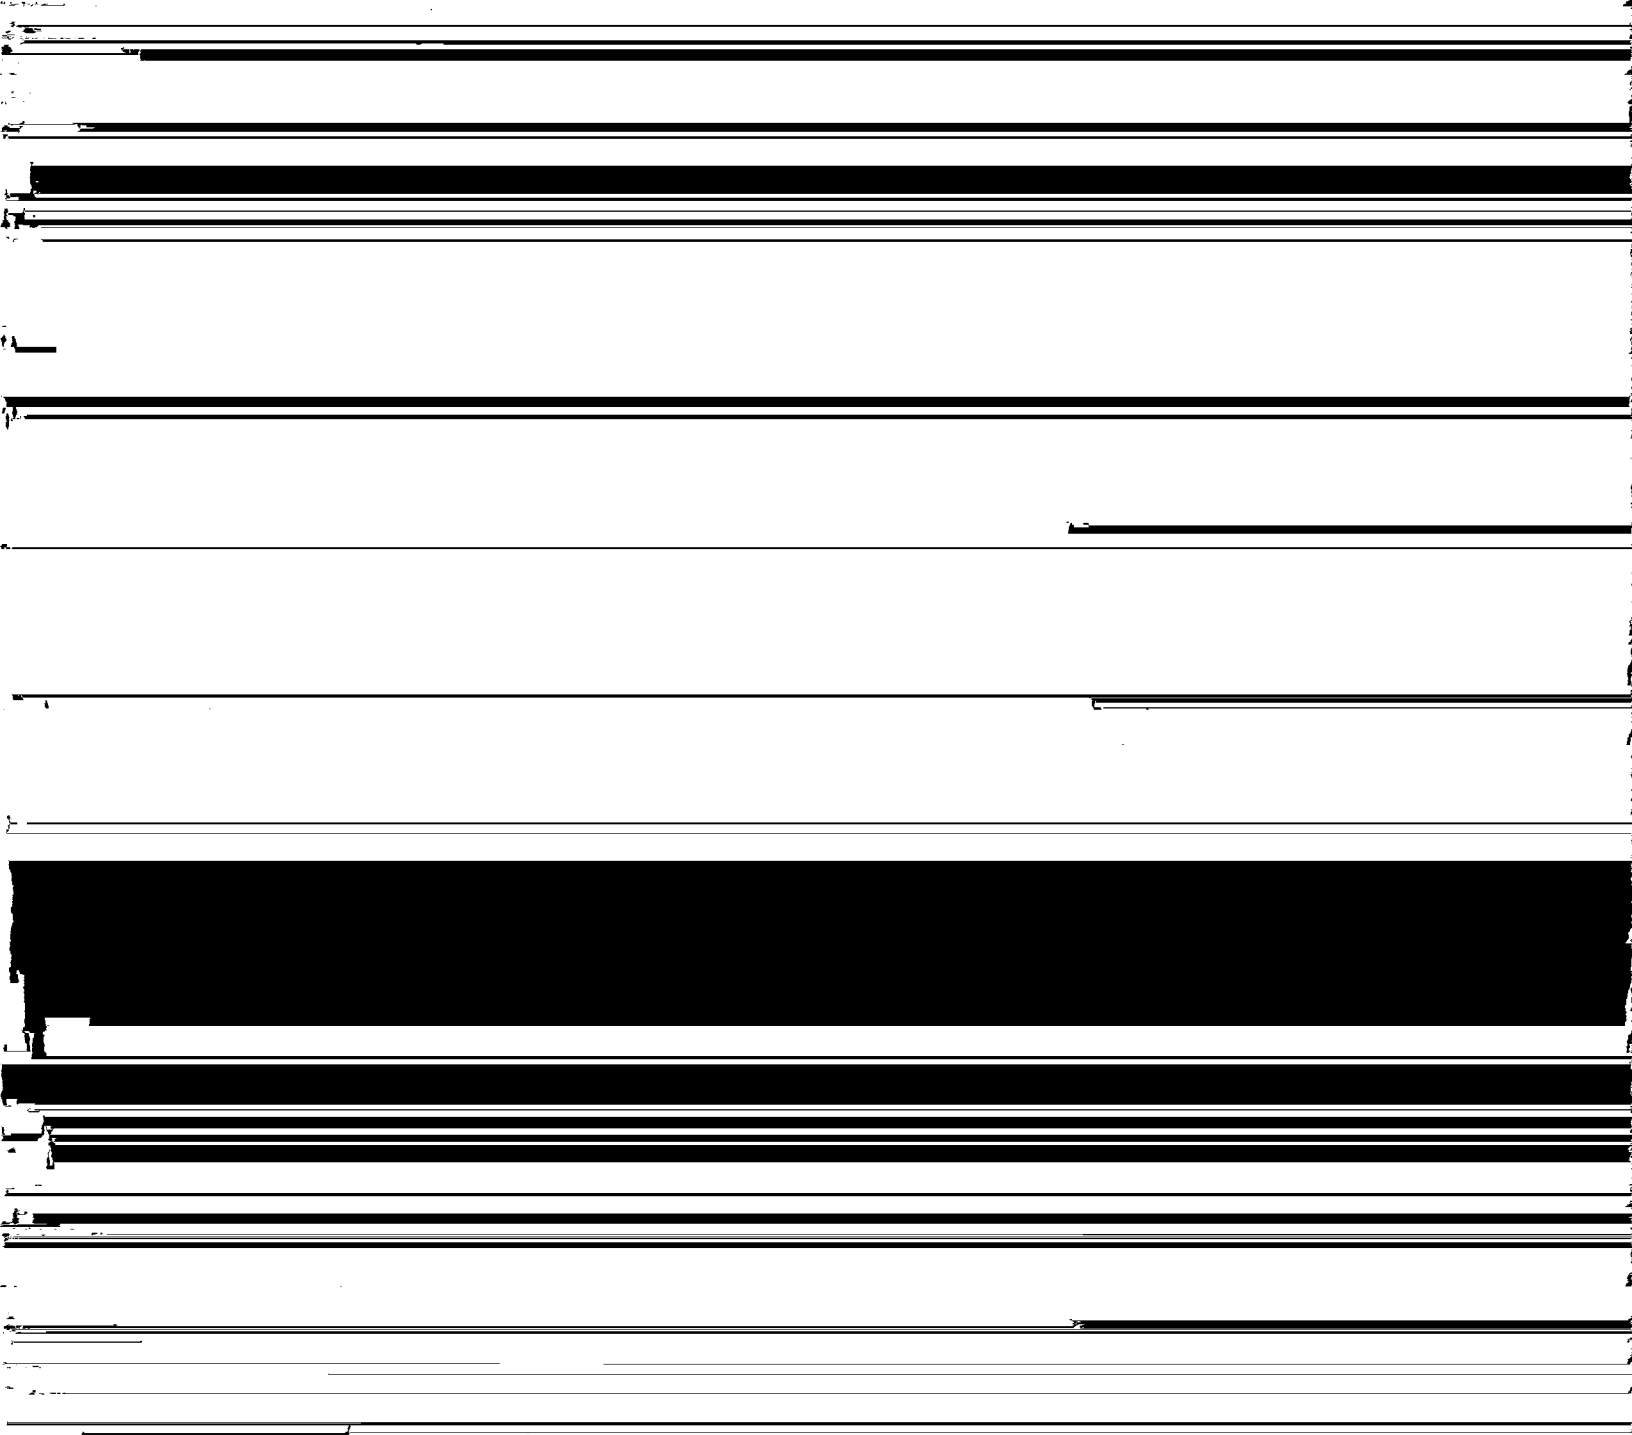

calendar quarter after the effective date of this Order. The progress reports shall contain the following information:

1. A summary of activities during the reporting period;
2. A summary of findings made during the reporting period;
3. A summary of changes made during the reporting period;
4. A summary of contacts made with representatives of the local community and public interest groups during the reporting period.

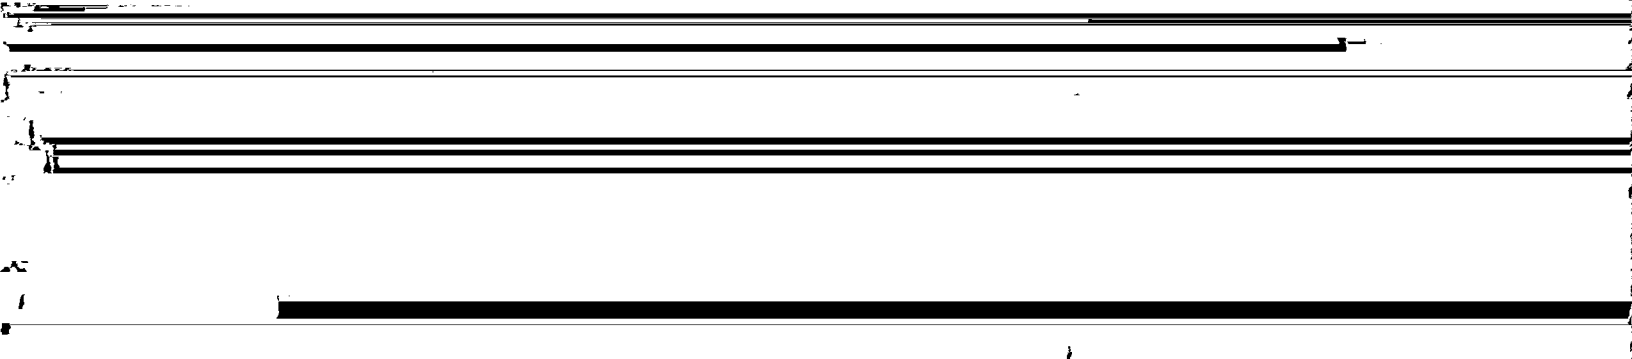

that exceed action levels, the Respondent shall provide written notice

any person who owns or resides on the land overlying the contaminated groundwater.

(f) ~~Notification of Contamination of Groundwater to the Respondent~~

Attachment 5  
Corrective Measures Study  
Scope of Work

Former Lockheed Martin French Road Facility  
Utica, New York

**PURPOSE**

The purpose of this Corrective Measures Study (CMS) is to identify, evaluate, and recommend corrective measures for the former Lockheed Martin French Road Facility in Utica, New York. The study will be conducted in accordance with the requirements of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) and the Resource Conservation and Recovery Act (RCRA). The study will include a site assessment, data review, and the development of a corrective measures plan (CMP). The CMP will identify the corrective measures that are necessary to protect human health and the environment from the potential risks associated with the site. The study will also provide an estimate of the cost of the corrective measures and a schedule for their implementation. The study will be completed by the end of the calendar year 2001.

**TASK I: IDENTIFICATION AND DEVELOPMENT OF THE CORRECTIVE**

In the CMS Report, Respondent shall identify, screen, and develop the alternative(s) for removal, containment, treatment, and/or other remediation of the contamination based on the remedial goals/criteria identified in Attachment 2.

A. Description of Current Situation

Respondent shall provide the results of the following:

1. The effectiveness of the alternative under analogous Site conditions;
2. The potential impact resulting from a failure of the alternative, including failures from uncontrollable changes at the Site (e.g., heavy rain storms, induced groundwater flow changes from off-site pumping wells); and
3. Estimates of the projected useful life of the alternative and of its component

technologies.

B. Reduction in the Toxicity, Mobility or Volume of Wastes

~~As a general goal, preferred remedial action techniques, such as treatment technologies,~~

that are capable of eliminating or substantially reducing the inherent potential for the

3. The availability of adequate off-site treatment, storage capacity, disposal services, needed technical services and materials; and
4. The availability of prospective technologies for each alternative.

E. Cost

D. The cost of each alternative. The cost estimator shall
